

MDB's Coaching Basketball Education (CBE)

On-court clinics for basketball coaches, grades 3-9. Better prepared, more well-informed coaches make better teachers. Many coaches lack the necessary knowledge and understanding of what grade specific skills and concepts should be taught, and more importantly, how to properly teach these skills and concepts.

- Clinics are designed to provide youth coaches the necessary tools to be an effective coach/teacher at the grade level they will be coaching.
- Curriculum focuses on how to teach skills and concepts that every player should be introduced to.
- The coaches will have an opportunity to observe, actively participate on the court and ask questions during the clinic.
- Our program provides all coaches and/or youth basketball associations the direction and tools to develop a positive "Coaching Philosophy."
- 1.5-2 hour clinics.
- Each coach receives a Coaches Handbook.
